

**A WHOLLY ORGANIC
NUTRIENT PROGRAM
FOR PROFESSIONAL
GROWERS**

SEAWEED GRO

*Amigo
Bob's*

**FOR SPECIALTY
GARDENING**

Bob Cantisano, aka Amigo Bob, has dedicated his life's work to the creation of the purest, most effective organic soil nutrients. Amigo Bob's Seaweed Gro formulation, made up of organic elements including a proprietary blend of nutrient rich seaweed, will deliver larger, healthier plants with fewer pests and higher yields.

Our easy to use and comprehensive organic program was formulated by our team of experts who have over 50 years experience in organic commercial agriculture. They include Amigo Bob, and other founding growers in the organic movement. All of their knowledge and wisdom has been combined to produce a product that is superior to anything in the market place today. All of your plant needs are addressed including macronutrients, micronutrients, humic acids, and microbiology. Using our program you will achieve increased yields and superior quality.

Our products comply with food grade growing standards and they are not "salt" based, so no need to flush your soils or watering systems when using our program. The source of our products are of the highest quality and are processed to comply with organic standards.

All Amigo Bob's Seaweed Gro Products are compliant with the National Organic Program (NOP), which will insure compliance with state regulations for organic practices. When growing medicinal herbs or any plants for commercial use it is important to produce a clean, safe harvest, as state regulations are becoming more stringent.

AMIGO BOB'S SUPERFOOD PROPRIETARY BLEND:

Superfood is a proprietary blend of nutrient rich seaweed, fish and other essential minerals that you will use throughout the growing cycle.

1ST STAGE POWER GRANULES BLEND:

The 1st Stage Power Granules are used to fertilize your plants until they begin to flower. This product gives your plants just the right amount of the necessary nitrogen, calcium and phosphorus for leaf formation and general plant stability.

2ND STAGE POWER GRANULES BLEND:

The 2nd Stage Power Granules are used to fertilize your plants after they begin to flower. The percentage of nitrogen, phosphorus, potash and calcium are designed to allow your plant to put all of its energy into the flowering/fruiting stage and produce the highest quality and largest yields.

EARLY SEASON MICROBES:

A natural blend of microbes designed to enhance plant growth and increase decomposition of organic and inorganic materials.

LATE SEASON MICROBES:

This is a natural blend of microorganisms and fresh water green algae designed to enhance plant growth.
